

Hi, my name is Gaurav Mittal, and I'm from Punjab.

Over the course of my high school and graduation, I've developed valuable skills such as leadership, teamwork, and adaptability. More importantly, I've discovered my passion for entrepreneurship.

On the technical side, I've gained hands-on experience with programming languages like HTML, CSS, JavaScript, and Java. I've also worked with popular JavaScript frameworks and libraries such as React.js, Express.js. In addition, I have knowledge of database management.

Along the way, I've worked on several real-world technical projects:

- ♦ **Note.me** – A full-stack note-taking web application built using the **MERN stack**. It allows users to create, edit, and delete notes with a clean and intuitive UI.
- ♦ **E-commerce Clothing Store Website** – I developed a fashion-focused online store using **HTML, CSS, JavaScript, and Firebase**. It featured user authentication, product catalogs, and cart functionality.
- ♦ **Portfolio Website** – I created my own personal portfolio website using **React** and **Tailwind CSS**, showcasing my work, skills, and contact information in a visually appealing way.

Each of these projects helped me grow not just as a developer, but also as a problem-solver who's capable of building scalable and user-centric applications.

I'm proficient in reading and writing Four languages – Hindi, English, French and Punjabi. I've also completed a certification level 1 in French. Being multilingual helps me connect better with people from different backgrounds, both in business and in life.

My entrepreneurial journey began when I noticed a common issue in the fashion industry—people were spending ₹200 to ₹500 on clothes that looked good but didn't last beyond one or two washes.

That observation inspired me to create **OMAV D'sign**, a clothing startup that focuses on durability and quality.

At Omap D'sign, we're committed to delivering premium-quality clothing that's affordable, stylish, and long-lasting. Currently, we're focused on t-shirts, but we're actively expanding our catalog to include more categories.

I'm involved in everything from product research to marketing and customer feedback, and this hands-on experience has taught me how to turn an idea into a business reality.

I strongly believe that learning never stops. Whether it's coding a new feature, understanding customer needs, or exploring global trends, I'm always open to new knowledge and opportunities.

I'm constantly looking for ways to expand my skill set and take my entrepreneurial vision to the next level.

If you're interested in connecting, collaborating, or even sharing ideas—I'd love to hear from you.

You can reach me directly at **98145-68930**.

Thank you for watching, and I look forward to growing, learning, and building the future—together.
